Tallinn Declaration Objectives in Public Administrations (summary)

MS objectives in the next five years (2018-2022)

- For the principles of **digital-by-default, inclusiveness and accessibility** ensure:
 - that citizens and businesses may interact digitally with public administration;
 - ensure the consistent quality of user experience in digital public services as set out in the “User-centricity principles for design and delivery of digital public services”
 - increase the readiness of citizens and businesses to interact digitally with the public administrations.
- For the principle of **once only**:
 - implement it for key public services
- For the principle of **trustworthiness and security** ensure:
 - information security and privacy; and increase uptake of national eID schemes.
- For the principle of **openness and transparency**.
 - Make possible for citizens and businesses to better manage their personal data held by public administrations.
- For the principle of **interoperability by default**:
 - work on national interoperability frameworks based on the European Interoperability Framework (EIF), ... adhere to EIF for cross-border digital public services.
